Staycations have increased in popularity with many people choosing to vacation at home as opposed to going abroad. It is predicted that more than 25 percent will choose a staycation instead of going abroad this year, which is a 5 percent increase compared to last year. "All that matters is that you come home feeling refreshed, not how much you spend or where you go." It's up to you to decide whether you agree or not.

The score ranges above are guidelines only and should not stand alone in any hiring decision.
